TECHNICAL SKILLS

- Programming: Java(OOPs), SQL
- Web: HTML, CSS
- Tools: VS Code, Eclipse, MySQL Command Line Prompt, MS Excel
- Communication, Problem-solving

PROJECT

VIRTUAL MOUSE

 The "VIRTUAL MOUSE" project provides an innovative solution for human-computer interaction, particularly when a traditional physical mouse is unavailable. By utilizing only a camera, this real-time processing system allows users to interface with smart devices like smartphones, tablets, and laptops. Its primary objective is to offer an alternative input method, thereby enhancing accessibility and user interaction with computer systems. This project overcomes the limitations of not having a physical mouse, allowing seamless control and navigation. Key benefits include increased flexibility, improved accessibility for a wider range of users, and a demonstration of innovative input technology. Furthermore, the system is designed with accessibility and customizability as core features, ensuring a tailored and intuitive user experience

INTERNSHIP / TRAINING

 As a FULL STACK JAVA DEVELOPER in TAP ACADEMY

EXTRA CURRICULAR ACTIVITIES

- **Languages:** English, Hindi, Kannada
- **Hobbies & Interests:** Reading Books, Drawing
